

MoSPI Manual: Digital Governance, Data Privacy & SDG Framework

Official Reference Document ID: MoSPI/SDG/2026/DOC-04

1. Sustainable Development Goals (SDG) National Indicator Framework

The National Indicator Framework (NIF) monitors progress across 17 SDGs using 300+ national indicators aligned with NITI Aayog guidelines. Data flows are synchronized across central line ministries and State/UT Directorates of Economics and Statistics (DES).

2. Digital Personal Data Protection (DPDP) Compliance

Statistical operations comply with Digital Personal Data Protection (DPDP) regulations. Microdata dissemination protocols require differential privacy, k-anonymity ($k \geq 5$), and suppression of direct identifiers prior to public release.

3. Cyber Security Protocols & Government Cloud Standards

All statistical web portals, microdata repositories, and survey CAPI applications are hosted on MeiTY-empanelled Cloud Service Providers (CSPs). Encryption standards mandate AES-256 for data at rest and TLS 1.3 for data in transit.

4. Capacity Building & FRAC Competency Framework

Capacity building initiatives follow the iGOT Karmayogi FRAC (Framework for Roles, Activities, and Competencies) model to systematically map, assess, and bridge competency gaps across statistical, technical, digital governance, and managerial pillars.
